WEB & APP DEVELOPER (ENTRY-LEVEL)

## PROFESSIONAL SUMMARY

Detail-oriented Computer Science student with hands-on experience developing full-stack web and mobile systems using React, Node.js, Firebase, and PHP. Experienced in building dashboards, inventory systems, and presenting system architecture in academic research settings.

## NOTABLE PROJECTS

### LakbAI – AI Travel Itinerary Planner

**React, Node.js, Firebase** [[lakbai.onrender.com](https://lakbai.onrender.com)].

- Built a responsive AI-powered web app that generates personalized travel itineraries based on user budget, duration, and preferences.
- Implemented Association Rule Mining to optimize itinerary recommendations.
- Developed an admin dashboard and integrated Firebase for authentication and data storage.
- Added social features including ratings, bookmarks, and sharing to improve user engagement.

### KJC Bike Shop – Inventory & Service System

**React.js** [[kjcbikeshop.onrender.com](https://kjcbikeshop.onrender.com)].

- Developed a live product and service catalog for a local business.
- Implemented Excel-based bulk inventory import, reducing manual data entry.
- Enabled real-time price and availability updates to improve customer information accuracy.

## LEADERSHIP AND INVOLVEMENT

### AI-Driven Itinerary Travel Planner — Research Presenter

CICT Faculty Research Colloquium, Taguig City University | May 2025

- Presented a research proposal on an AI-driven travel itinerary planner, highlighting the integration of association rule mining and machine learning for expense prediction.
- Facilitated a technical deep dive into the system's conceptual framework and methodology for a panel of faculty experts.
- Engaged in a scholarly exchange with the CICT Dean and faculty coordinators, incorporating constructive feedback into the ongoing project development.
