PROFESSIONAL SUMMARY

Computer Science student graduating June 2026 and Cum Laude awardee with hands-on experience designing, developing, and deploying full-stack systems for government operations, including queueing, attendance, and scheduling platforms using Java, React, Supabase, and PostgreSQL.

WORK EXPERIENCE

TESDA MuntiParLasTaPat (MPLTP) District Office	February 4, 2026 – May 2026
<i>Full-Stack Developer Intern</i>	<i>Bldg. 8, Gate 2, TESDA Complex, East Service Road, Taguig City</i>
• Developed two Queueing Management System (QMS) versions for district and regional offices, tailored to operational workflows. • Designed a secure SQLite local database for offline-first data storage and synchronization. • Built a cloud-connected DTR system using Supabase and PostgreSQL for attendance automation.	

PROJECTS

Queueing Management System (QMS)	March 2026
<i>Main Developer</i>	
• Developed a queueing system with a mobile web-based ticket issuance and display interface accessible via LAN, used by CAV, Info Desk, Renewal, and Cashier for inter-section queue routing. • Implemented secure LAN-based hosting for offline operation across devices. • Built a desktop application that synchronizes queue data between the admin PC and display monitors.	
DTR Automation System	April 2026
<i>Main Developer</i>	
• Developed a cloud-based DTR system using Supabase and PostgreSQL for attendance tracking and reporting, currently used by job order and regular employees in the office. • Automated attendance records and monthly report generation, significantly reducing manual administrative workload.	
Teaching Load System (Regional Training Center)	May 2026
<i>Main Developer</i>	
• Developed a web-based scheduling platform to automate the tracking of instructor teaching loads. • Streamlined human resource workflows by eliminating manual scheduling conflicts and optimizing trainer allocations.	

EDUCATION

Taguig City University	September 2022 – June 2026
<i>Bachelor of Science in Computer Science</i>	

SKILLS & AWARDS

- **Skills:** Languages: JavaScript, TypeScript, Java, Python, SQL | Frontend: React, HTML, CSS | Mobile: Java | Backend & Database: Supabase, PostgreSQL, SQLite, Firebase | Tools: GitHub, VS Code, Render
- **Awards:** Cum Laude · 1.41 GWA · Consistent Dean's Lister 2022–2026 · TCU-CEAA Merit Scholar
